PROFESSIONAL SUMMARY

Analytical Computer Science undergraduate at Uva Wellassa University, specialising in Data Science, Machine Learning, Deep Learning, and NLP. Proficient in Python, TensorFlow, Scikit-Learn, BERT, Power BI, and Azure with hands-on experience building ML pipelines, deep learning models, and AI-powered applications. Founder of Aspirev a live AI career SaaS platform and Microsoft Student Ambassador, seeking a Data Scientist role to deliver data-driven solutions.

EDUCATION

BSc (Hons) in Computer Science & Technology

Oct 2023 - Present

Uva Wellassa University of Sri Lanka

- GPA: 3.52 / 4.00 (Reading)
- Relevant Coursework: Database Management Systems, Object-Oriented Programming, Statistical Methods, Data Structures & Algorithms, Intelligent Systems, Web Programming.

Data Science Bootcamp (3 Months)

Jul 2024 - Nov 2024

DSAcademy.lk

- Intensive training in Python, SQL, Pandas, EDA, Regression Modelling, NLP basics, and Data Visualization. Tools: Jupyter, NumPy, Matplotlib, Seaborn, Power BI

TECHNICAL SKILLS

Machine Learning : Regression, Classification, Random Forest, Decision Trees, Gradient Boosting, Model Evaluation, Feature Engineering, Hyperparameter Tuning, Naïve Bayes

Deep Learning & Computer Vision : ANN, CNN, EfficientNet, ResNet, Transfer Learning, Grad-CAM, SMOTE, TensorFlow, Keras, OpenCV, PyWavelets, NLP, BERT, Text Classification

Data Science & Analytics : Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Modelling, Data Storytelling, KPI Reporting, Business Intelligence, SQL

Libraries & Frameworks : Scikit-Learn, Pandas, NumPy, Flask, Next.js, React, Node.js, FastAPI, Redis, BullMQ

BI & Visualization : Power BI (DAX, Power Query, Star Schema), Matplotlib, Seaborn

Tools & Platforms : Git/GitHub, Jupyter Notebook, Google Colab, VS Code, Anaconda, Microsoft Azure, Docker

EXPERIENCE

Founder & Full-Stack AI Engineer | Aspirev

2026 - Present

AI-Powered Career Intelligence Platform | www.aspirev.com

- Built and launched a full-stack AI career platform featuring AI resume analysis (0–100 scoring), ATS compatibility checking against Workday, Taleo, Greenhouse & Lever, job matching, career roadmaps, Kanban job tracker and portfolio builder.
- Engineered the complete backend architecture: Node.js/Express and FastAPI microservices, BERT-based NLP resume parsing, Redis/BullMQ async processing, MongoDB Atlas with compound indexing, JWT/OAuth authentication, PayPal integration, and rate-limiting security controls.
- Deployed on Microsoft Azure with Next.js 15 frontend, Tailwind CSS v4, server-side optimizations, NoSQL injection protection, and threadpool offloading for CPU-intensive AI operations.

PROJECTS

RetinaScan AI - Diabetic Retinopathy Detection (EfficientNetB0 | Grad-CAM | Flask | Azure)

June 2026

- Built a full-stack AI web application classifying diabetic retinopathy severity across 5 stages from retinal fundus images using efficientNetB0 transfer learning with Grad-CAM heatmap explainability.

- Solved class imbalance using class-weighted loss on the APTOS 2019 dataset (3,662 labelled images); achieved 71% validation accuracy deployed live on Microsoft Azure.
- Tools: Python, TensorFlow/Keras, EfficientNetB0, Grad-CAM, Flask, HTML/CSS/JS, Microsoft Azure

Freelancer Earnings Predictor (Random Forest | Flask | Azure) [↗](#)

April 2026

- Developed and deployed a full-stack ML web app predicting freelancer monthly earnings; built end-to-end pipeline with EDA, feature engineering, and GridSearchCV model selection.
- Developed and deployed a full-stack ML web app predicting freelancer monthly earnings; built end-to-end pipeline with EDA, feature engineering, and GridSearchCV model selection.
- Random Forest Regressor achieved R^2 of 0.7183; provides real-time predictions with feature importance analysis, earnings percentile ranking, and career growth comparisons.
- Tools: Python (Pandas, NumPy, Scikit-Learn), Flask, Tailwind CSS, Microsoft Azure

Bank Customer Churn Prediction (ANN | TensorFlow | SMOTE) [↗](#)

May 2026

- Built an end-to-end ANN using TensorFlow/Keras on 10,000 real customer records with 14 features; applied Label Encoding, One-Hot Encoding, and MinMaxScaler preprocessing pipeline.
- Resolved class imbalance (80/20 split) using SMOTE - improved minority class recall from 67% to 83%, achieving 81% balanced accuracy with equal Precision and F1-Score across both classes.
- Tools: Python, TensorFlow, Keras, Scikit-Learn, SMOTE, Pandas, Matplotlib, Seaborn

KineticLens - Sports Person Image Classifier (OpenCV | SVM | PyWavelets | Flask) [↗](#)

April 2026

- Built an end-to-end computer vision system classifying 5 world-famous athletes from facial images using OpenCV Haar Cascade face detection and PyWavelets feature engineering (4096-dim feature vector).
- Trained SVM, Random Forest, and Logistic Regression via GridSearchCV; SVM (RBF kernel) achieved 53% accuracy - 2.6x better than random baseline (20% for 5 classes).
- Tools: Python, OpenCV, PyWavelets, Scikit-Learn, Flask, HTML/CSS/JavaScript

Executive Sales Analytics Dashboard (Power BI | DAX | Star Schema) [↗](#)

April 2025

- Engineered an interactive executive sales dashboard with real-time slicers, KPI cards, and category drill-through analysis using a star-schema data model and custom DAX measures.
- Uncovered a \$2.3M revenue opportunity and reduced manual reporting time by 60% through data-driven executive insight delivery.
- Tools: Power BI, DAX (ALLEXCEPT, KEEPFILTERS), Power Query, Star Schema Design

CERTIFICATIONS

Machine Learning Specialization - Stanford University & DeepLearning.AI Coursera ↗	April 2026
Advanced Learning Algorithms - DeepLearning.AI Coursera ↗	Jan 2026
Supervised Machine Learning: Regression & Classification - DeepLearning.AI Coursera ↗	Jan 2026
Supervised ML: Logistic Regression & Naïve Bayes - Online Course ↗	Dec 2025
Level Up: Python Data Acquisitions, Prep & EDA - LinkedIn Learning ↗	Dec 2024
SQL for Beginners - Alison ↗	Jul 2024

LEADERSHIP & VOLUNTEERING

Microsoft Student Ambassador | Microsoft

Apr 2026 - Present

Leading technical workshops, promoting Microsoft technologies, and supporting the student developer community at Uva Wellassa University.

Treasurer | IEEE Uva Wellassa University Student Branch

May 2026 - Present

Managing financial planning, budgeting, and fund allocation, supporting execution of technical events, workshops, and IEEE-affiliated programmes.

Project Chair – HackMS'26 Hackathon | MS Club, Uva Wellassa University

Oct 2025 - Jan 2026

Led end-to-end planning of a 12-hour hackathon and internship pathway program with industry mentors and 100+ student participants.

Student Coordinator - Data Science & AI Track | IMPETUS Research Symposium

Jan 2026 - May 2026

Managed participant communications, abstract reviews, and research submission pipeline.
