PROFESSIONAL SUMMARY

Analytical Computer Science undergraduate specialising in Data Science, Machine Learning, and AI. Proficient in Python, TensorFlow, Scikit-Learn and Power BI, with hands-on experience building and deploying end-to-end ML pipelines, deep learning models, and full-stack AI web applications on Microsoft Azure. Microsoft Student Ambassador actively seeking a Data Scientist Intern role to turn data into real-world impact

TECHNICAL SKILLS

Machine Learning :	Supervised Learning, Regression, Classification, Random Forest, Naïve Bayes, Decision Trees, Gradient Boosting, Model Evaluation, Feature Engineering
Neural Networks & Deep Learning :	ANN, CNN, RNN, EfficientNet, ResNet, Transfer Learning, Grad-CAM, SMOTE, TensorFlow, Keras, Class Imbalance Handling
Analytics & Visualization:	EDA, Data Preprocessing, Statistical Analysis, Predictive Modelling, Data Storytelling, KPI Reporting, Business Intelligence
Libraries & Frameworks :	Scikit-Learn, Tensorflow, Pandas, NumPy, Matplotlib, Seaborn, Flask, OpenCV.
BI & Visualization :	Power BI (DAX, Power Query, Star Schema)
Programming & Databases:	Python, SQL (MySQL), MongoDB, HTML/CSS, JavaScript, React Native, TypeScript, Django
Tools & Platforms:	Git/GitHub, Jupyter, Google Colab, VS Code, Anaconda, Microsoft Azure

PROJECTS AND EXPERIENCE

- RetinaScan AI - Diabetic Retinopathy Detection | CNN Web App**  June 2026
 - Built and deployed a full-stack AI web app classifying diabetic retinopathy severity (5 stages) from retinal fundus images using EfficientNetB0 transfer learning; Grad-CAM heatmaps provide model explainability.
 - Handled class imbalance using class-weighted loss on APTOS 2019 dataset (3,662 images); achieved 71% validation accuracy. Tools: TensorFlow/Keras, EfficientNetB0, Flask, Microsoft Azure
- Freelancer Earnings Predictor | Full-Stack ML Web App**  April 2026
 - End-to-end ML app predicting freelancer earnings; Random Forest via GridSearchCV achieved R^2 of 0.7183; real-time predictions with feature importance and percentile ranking deployed on Microsoft Azure.
 - Tools: Python (Pandas, NumPy, Scikit-Learn), Flask, Tailwind CSS, Microsoft Azure
- Bank Customer Churn Prediction | ANN Deep Learning**  May 2026
 - ANN on 10,000 customer records; solved class imbalance using SMOTE - improved minority recall from 67% to 83%, achieving 81% balanced accuracy. Tools: TensorFlow, Keras, SMOTE, Scikit-Learn
- KineticLens - Sports Person Image Classifier**  April 2026
 - End-to-end CV system classifying 5 athletes using OpenCV Haar Cascade and PyWavelets (4096-dim features); SVM (RBF) achieved 53% accuracy - 2.6× better than random baseline; deployed via Flask.
- Executive Sales Dashboard | Power BI**  April 2025
 - Interactive executive dashboard with star-schema DAX model, real-time slicers, and KPI metrics; uncovered a \$2.3M revenue opportunity and reduced manual reporting time by 60%.
- Bengaluru Property Estimator | Machine Learning Web App**  December 2025
 - Predictive model for residential property prices achieving ~84.5% cross-validated accuracy on 13,000+ records with EDA, One-Hot Encoding, and dimensionality reduction; deployed via Flask REST API
- COVID-19 Global Analytics Dashboard | Power BI**  December 2025

Created a 5-page interactive dashboard analysing global pandemic trends by continent, country, and US states with dynamic slicers, KPI cards, and month-level trend analysis. Tools: Power BI, DAX, Power Query

In Development

- **Aspirev** - AI-powered SaaS career intelligence platform with smart CV analysis, job matching, and career path recommendations using ML and NLP.

RESEARCH

Drone-Based Image Analysis for Open-Pit Mining | Uva Wellassa University

2026 – Present

Supervisor: Dr. Sathsara Dias | Proposal Stage

- Contributing to academic research applying drone photogrammetry and ML to automate layer identification, volume estimation, and ore-grade classification at Aruwakkalu Limestone Quarry, Sri Lanka.
- Role: Data annotation and CNN model building - labelling imagery across 5 material classes and developing the classification pipeline using EfficientNet/ResNet with transfer learning.

EDUCATION

BSc (Hons) in Computer Science & Technology

Oct 2023 – Present

Uva Wellassa University of Sri Lanka

- GPA: 3.52 / 4.00 (Reading)
- Relevant Coursework: Database Management Systems, Structured & Object-Oriented Programming, Microcomputer Architecture, Statistical Methods, Web Programming, Data Structures & Algorithms, Intelligent Systems.

Data Science Bootcamp (3 Months)

Jul 2024 – Nov 2024

DSAcademy.lk

- Training in Python, SQL, Pandas, EDA, Regression Modelling, NLP basics, and Data Visualization. Tools: Jupyter, NumPy, Matplotlib, Seaborn, Power BI.

CERTIFICATIONS

Machine Learning Specialization – Stanford University & DeepLearning.AI | Coursera | Apr 2026

Skills: Supervised & Unsupervised Learning, Neural Networks, TensorFlow, Recommender Systems, Reinforcement Learning

Advanced Learning Algorithms – DeepLearning.AI | Coursera | Jan 2026

Skills: Neural Networks, TensorFlow, Decision Trees, Random Forest, Model Evaluation, Deep Learning

Supervised Machine Learning: Regression & Classification – DeepLearning.AI | Coursera | Jan 2026

Skills: Python, NumPy, Scikit-learn, Logistic Regression, Feature Engineering, Predictive Modelling

Supervised ML: Logistic Regression & Naïve Bayes – Online Course | Dec 2025

Skills: Logistic Regression, Naïve Bayes, Scikit-learn

Level Up: Python Data Acquisitions, Prep & EDA – LinkedIn Learning | Dec 2024

Skills: Python, Data Acquisition, Exploratory Data Analysis (EDA)

SQL for Beginners – Alison | Jul 2024

Skills: SQL Fundamentals, Database Design, Query Techniques

LEADERSHIP & VOLUNTEERING

Microsoft Student Ambassador | Microsoft

Leading technical workshops, promoting Microsoft technologies, and supporting the student developer community at Uva Wellassa University.

Treasurer | IEEE Uva Wellassa University Student Branch

Managing financial planning, budgeting, and fund allocation; supporting technical events, workshops, and IEEE-affiliated programmes.

Project Chair – HackMS'26 Hackathon | MS Club, Uva Wellassa University

Led end-to-end planning and execution of a 12-hour hackathon and internship pathway program with 100+ student participants.

Student Coordinator – Data Science & AI Track | IMPETUS Research Symposium

Managed participant communications, abstract reviews, and research submission pipeline.
