PROFESSIONAL SUMMARY

Computer Science undergraduate specialising in Data Science, Machine Learning, and Predictive Analytics. Proficient in Python, SQL, Pandas, NumPy, Scikit-Learn, Power BI, and Tableau with hands-on experience building ML pipelines and BI dashboards. Microsoft Student Ambassador actively seeking a Data Scientist Intern role to deliver data-driven solutions to real-world challenges.

TECHNICAL SKILLS

Machine Learning:	Supervised Learning, Regression, Classification, Random Forest, Naïve Bayes, Decision Trees, Gradient Boosting, Model Evaluation, Feature Engineering, Hyperparameter Tuning; Neural Networks & Deep Learning (in progress)
Analytics & Visualization:	Exploratory Data Analysis (EDA), Data Preprocessing, Statistical Analysis, Predictive Modelling, Data Storytelling, KPI Reporting, Business Intelligence
Libraries & Frameworks:	Scikit-Learn, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, Flask, OpenCV (Haar Cascade, Image Classification), PyWavelets
BI & Visualization:	Power BI (DAX, Power Query, Star Schema), Tableau
Programming & Databases:	Python, SQL (MySQL), HTML/CSS, MongoDB, Node.js, React Native, TypeScript, Django
Tools & Platforms:	Git/GitHub, Jupyter Notebook, Google Colab, VS Code, Anaconda, Microsoft Azure

PROJECTS AND EXPERIENCE

Freelancer Earnings Predictor | Full-Stack ML Web App April 2026

- Developed and deployed a full-stack ML application predicting freelancer monthly earnings based on job category, experience level, hourly rate, and project complexity.
- Built end-to-end ML pipeline with EDA, feature engineering, and GridSearchCV model selection; Random Forest Regressor achieved R^2 of 0.7183.
- Provides real-time salary predictions with feature importance analysis, percentile ranking, and career comparisons; deployed on Microsoft Azure.
- Tools: Python (Pandas, NumPy, Scikit-Learn), Flask, Tailwind CSS, Microsoft Azure

KineticLens - Sports Person Image Classifier April 2026

- Built an end-to-end ML system classifying five world-famous athletes from facial images using classical computer vision and supervised learning.
- Applied OpenCV Haar Cascade for face detection; PyWavelets combined with raw pixels produced a 4096-dimensional feature vector per image.
- Best model: SVM (RBF kernel) achieving 53% accuracy — 2.6× better than random baseline; deployed via Flask REST API with a custom frontend.
- Tools: Python, OpenCV, PyWavelets, Scikit-Learn, Flask, HTML/CSS/JavaScript

Executive Sales Analytics Dashboard | Power BI April 2025

- Engineered an interactive executive dashboard with real-time slicers, KPI metrics, star-schema data model, and custom DAX measures (ALLEXCEPT, KEEPFILTERS) for accurate cross-filtering.
- Uncovered a \$2.3M revenue opportunity and reduced manual reporting time by 60%. Tools: Power BI, DAX, Power Query

Bengaluru Property Estimator | Machine Learning Web App December 2025

- Built a predictive model for residential property prices achieving ~84.5% cross-validated accuracy; conducted EDA on 13,000+ records with One-Hot Encoding, dimensionality reduction, and outlier handling.
- Deployed real-time predictions via Flask REST API. Tools: Python (Pandas, NumPy, Scikit-learn), Flask, HTML/CSS

COVID-19 Global Analytics Dashboard | Power BI December 2025

- Created a 5-page interactive dashboard analysing global pandemic trends by continent, country, and US states with dynamic slicers, KPI cards, and month-level trend analysis. Tools: Power BI, DAX, Power Query

EDA-201 Rental Data Analysis | Python

January 2025

- Conducted end-to-end EDA on rental dataset: missing value imputation, outlier detection, categorical conversion, and visualisation of price trends. Tools: Python (Pandas, Matplotlib, Seaborn)

Academic & University Projects (Full-Stack Development)

- FuelMate: Mobile fuel expense tracker (React Native + TypeScript) February 2026
- Hostel Maintenance System: Hostel operations management (Django + React) February 2026
- Agrilink Marketplace: Agricultural e-commerce platform (React, PHP, MySQL) October 2025

EDUCATION

BSc (Hons) in Computer Science & Technology

Oct 2023 – Present

Uva Wellassa University of Sri Lanka

- GPA: 3.52 / 4.00 (Reading)
- Relevant Coursework: Database Management Systems, Structured & Object-Oriented Programming, Microcomputer Architecture, Statistical Methods, Web Programming, Data Structures & Algorithms, Intelligent Systems.

Data Science Bootcamp (3 Months)

Jul 2024 – Nov 2024

DSAcademy.lk

- Training in Python, SQL, Pandas, EDA, Regression Modelling, NLP basics, and Data Visualization.
- Tools: Jupyter, NumPy, Matplotlib, Seaborn, Power BI.

CERTIFICATIONS

Machine Learning Specialization – Stanford University & DeepLearning.AI | Coursera | Apr 2026

Skills gained: Supervised & Unsupervised Learning, Neural Networks, TensorFlow, Decision Trees, Recommender Systems, Anomaly Detection, Reinforcement Learning, Deep Q-Learning

Advanced Learning Algorithms – DeepLearning.AI | Coursera | Jan 2026

Skills gained: Neural Networks, TensorFlow, Decision Trees, Random Forest, Boosted Trees, Classification Algorithms, Logistic Regression, Model Evaluation, Deep Learning, Data Ethics

Supervised Machine Learning: Regression & Classification – DeepLearning.AI | Coursera | Jan 2026

Skills gained: Python, NumPy, Scikit-learn, Regression Analysis, Logistic Regression, Feature Engineering, Predictive Modelling, Data Preprocessing, Model Evaluation

Supervised ML: Logistic Regression & Naïve Bayes – Online Course | Dec 2025

Skills gained: Logistic Regression, Naïve Bayes, Scikit-learn

Level Up: Python Data Acquisitions, Prep & EDA – LinkedIn Learning | Dec 2024

Skills gained: Python, Data Acquisition, Exploratory Data Analysis (EDA)

SQL for Beginners – Alison | Jul 2024

Skills gained: SQL Fundamentals, Database Design, Query Techniques

LEADERSHIP & VOLUNTEERING

Microsoft Student Ambassador | Microsoft

Serving as a Microsoft Student Ambassador; leading technical workshops, promoting Microsoft technologies, and supporting the student developer community at Uva Wellassa University.

Treasurer | IEEE Uva Wellassa University Student Branch

Managing financial planning, budgeting, and fund allocation for the student branch; supporting execution of technical events, workshops, and IEEE-affiliated programmes.

Project Chair – HackMS'26 Hackathon | MS Club, Uva Wellassa University

Led end-to-end planning and execution of a 12-hour hackathon and internship pathway program with industry mentors and 100+ student participants.

Student Coordinator – Data Science & AI Track | IMPETUS Research Symposium

Managed participant communications, abstract reviews, and research submission pipeline.
